- Focus students on Activity 2. Direct them to the first photograph. Ask a student to read the first sentence. Students stand up and follow the instruction. Check that students have their hands in the correct position (center-left of their chest). Ask *Can you find your heartbeat?* Go around and help students. Read the question *Is your heartbeat quick or slow?* Students may give different answers, but point out that when they are standing still their heartbeat should be slow.

Note: You will need space for the next part of the activity. If there isn’t enough space for everyone to take part in your classroom, call two volunteers to do the activity at the front of the class.

- Ask two students to read the instructions for the next two photographs. Check everyone knows what to do. Ask *How many seconds in a minute?* (Students respond 60). Students work in pairs or small groups. Hand a stopwatch or timer to each pair/group (if available). They decide who will jump and who will time the minute. Tell the students who are timing to say *Start* at the beginning of the minute and *Stop* when the minute is finished. If you don’t have timers, time the minute yourself.
- Pairs/groups do the activity. Monitor and check students are jumping as high as they can. When all the students have finished jumping, ask them *Is your heartbeat quick or slow?* Help them position their hands center-left of their chest again. Elicit the answer (*It’s quick*).
- Students repeat the activity, swapping roles.

SB34. ACTIVITY 3. Read and say “yes” or “no.”

- Focus students on Activity 3. Use the diagram to teach *blood* and *oxygen*. Direct students to the activity instructions and check understanding. Read through the sentences with the whole class. Remind students to whisper the answer to their partner first. Students read the text in pairs and decide if the sentences are true or false. Check with the class.

Key: 1 No. (Your heart moves blood.) 2 No. (Blood sends oxygen to different parts of your body.) 3 No. (Your heartbeat is slow when you are sleeping.) 4 No. (Your heartbeat is quick because your body needs more oxygen.)

WB34. ACTIVITY 1. Match.

- Tell students to open their Workbook to page 34. Focus them on Activity 1 and elicit what they can see (*a heart*). Students work individually. They check/discuss their answers in pairs. Check with the class.

Key: a blood from the body, b blood to the body, c blood to the lungs, d oxygen

WB34. ACTIVITY 2. Complete the chart. Write sentences.

- Ask a student to read the list of activities and ask the class to mime each thing. Students complete the chart in pairs. Check with the class. Then students write sentences individually. Elicit the sentences from different students.

Key: Sleeping X, Reading X, Jumping ✓, Dancing ✓
3 Your pulse isn’t quick when you sleep. 4 Your pulse isn’t quick when you read. 5 Your pulse is quick when you jump. 6 Your pulse is quick when you dance.

WB34. ACTIVITY 3. Read. Write “yes” or “no.”

- Check understanding of the activity instructions. Go through the example with the class. Students read the sentences individually and write *yes* or *no* in pencil. They check in pairs. Check with the class. Ask one student to read a sentence and the class to respond *Yes* or *No*. Elicit the correction for “no” responses.

Key: 2 yes, 3 yes, 4 no (Your blood sends oxygen to your heart.), 5 no (Your heartbeat is quick when you jump.) 6 yes

Extra activities: see page T103 (if time)

Ending the lesson

- Review with students what they learned about in today’s lesson.

OBJECTIVES: By the end of the lesson, students will have read and learned about their pulse, done an experiment, and completed a project.

● TARGET LANGUAGE

Key language: heart, quick, slow, heartbeat, pulse, minute

Additional language: number, take your pulse, finger, ride on a rollercoaster, hold a spider

Review: parts of the body, activities, present progressive, numbers 1–100, days of the week, daily routines

● MATERIALS REQUIRED

Project: Large sheets of paper, one for each student, colored pens

Extra activity 1: Two board pens in different colors

Extra activity 2: Word train materials from Student's Book pages 17 and 25
Extra activity 2, a piece of paper for the "wagon" for the words for this lesson

Warmer

- Draw a heart on the board and elicit the word. Ask students about the previous lesson, e.g., *Where is your heart? Put your hand on your heart. What does your heart do? Is your heartbeat quick when you sleep? Is your heartbeat quick when you jump?* Tell students they are going to do another science experiment.

SB35. ACTIVITY 4. Read, look, and answer.

- Tell students to open their Student's Book to page 35. Focus them on the text on the right first. Check comprehension of pulse, number, and minute.
- Focus students on the activity instructions and on photographs 1–6. Elicit what is happening in each photograph (students respond using the present progressive, e.g., *She's sleeping*). Teach new items as necessary (e.g., *riding on a rollercoaster, holding a spider*). Students work in pairs. Elicit answers.

Key: 1 slow, 2 quick, 3 slow, 4 quick, 5 quick, 6 quick

SB35. ACTIVITY 5. Take your pulse.

- Tell students they are going to try to find their pulse. Focus them on Activity 5, the instructions, and the photograph. Students stand up. Read the text aloud line by line. Circulate to help students locate their pulse.
- Once students have found their pulse, time one minute so they can calculate it. Say *Start!* at the beginning of the minute and *Stop!* at the end. Tell students that their pulse rate will be different from their friends', so each person has to count their own. Ask students to write down the number they get to at the end of the minute. Elicit some of the students' results (the range for a pulse rate for this age group is between 70 and 110).

SB35. PROJECT. Make your pulse chart.

- Focus students on the photographs. Elicit what the girl has (a chart showing her pulse rate when she is doing different things). Tell students they are going to make a similar chart. Write the list of activities on the board (*sitting, jumping, reading, dancing, running*). Students copy the list in their notebooks. Then they do each of the activities for a minute and take their pulse at the same time. They write the number for each activity in their notebooks. Time each minute for the whole class to do the activity together.

- Copy the axes of the chart on the board, writing the numbers from 50 to 110 in fives on the vertical axis, as shown in the photograph, and the activities on the horizontal axis. Students copy the chart in their notebooks. They transfer the numbers from the list in their notebooks to the chart and color the bar for each activity in a different color. Explain/elicite the meaning of the title of the girl's chart (*I love my heart* – the heart symbol means love). Students write the same heading for their own project. They compare their charts in pairs or small groups. Display the charts around the class.

WB35. ACTIVITY 4. MOVERS Listening, Part 3.

What food does Lily have in these places? Listen and write a letter in each box. There is one example. [M] toward

- Tell students to open their Workbook to page 35. Play the CD. Students complete the activity individually. They compare answers in pairs. Play the CD again. Check with the class.

Key: ice cream B, cake C, candy D, banana E, sandwich A

CD 2, 03

Listen and look. There is one example.

What's your favorite food, Lily?

I love it, too.
I love having ice cream on the beach.
Me, too. When it's really hot.
2. What about cake? Do you like that?
Yes! But I don't eat it very often. I only have it at parties.
Oh? Do you know how to make them?
Yes. We're learning to cook at school.
That's good.
3. Does your mom buy you candy?

That's nice.
Yes, but she never buys it for me at the supermarket.
4. What's your favorite fruit?
Bananas. I eat one every day.
Really?

5. Do you like having picnics?
Yes, I do.
Do you have sandwiches on your picnics?
Yes, I like egg ones, and my sister likes cheese ones.

Extra activities: see page T103 (if time)

Ending the lesson

- Review with students what they talked about in today's lesson and ask which activities they liked best from this and the previous day's lesson and why.
