

Teacher's notes

Reinforcement worksheet 1

- Students look at the pictures and write the names of the corresponding buildings below. They then find the words in the wordsearch puzzle.

Key: 1 market, 2 sports center, 3 library, 4 swimming pool, 5 hospital, 6 supermarket, 7 bus station, 8 movie.

- **Optional follow-up activity:** Students copy the remaining letters in the wordsearch puzzle (in order from left to right and top to bottom) to find (1) a task to do and (2) the name of what the children are looking at on page 36 of the Student's Book.

Key: (1) Draw a sign for a store. Ask your friends to think of a store. How many signs of stores are the same?
(2) map.

Reinforcement worksheet 2

- Students follow the instructions to make their way around the grid. They name where they are and select the most appropriate *must* sentence.

Key: 1 At the library. We must be quiet. 2 At the bus station. We must buy a bus ticket. 3 At the market. We must pay for the fish and fruit. 4 At the supermarket. We must pay for the milk and cookies. 5 At the swimming pool. We must take a towel. 6 At the movie theater. We must sit down.

- **Optional follow-up activity:** Students decide on a new route and tell their partners how to move around the town.

Extension worksheet 1

- Students start at the bus station. It is easier to give each student a die, but if you don't have enough, ask them to cut out the spinner, mount it on thin cardboard, and push a pencil through the center. Students spin the spinner and move that number of spaces. They check the box next to the action they can do there and complete the sentence with the name of the place. They continue moving around the board from one square to the next, moving in any direction until they have done all the errands.

Key: café, library, shoe store, clothing store, sports center, park, hospital, swimming pool, supermarket, toy store, amusement park.

- **Optional follow-up activity:** Students play in pairs or small groups. The winner is the first to complete the errands.

Extension worksheet 2

- This can be done as a listening exercise (Track 10) or a reading exercise. Students look at the negative sentences and phrases at the bottom of the page and make them affirmative. They then decide which frame each affirmative sentence belongs to.

Key: See Student's Book, page 41.

- **Optional follow-up activity:** Students work in groups of four. Each student cuts out the six frames. They then shuffle all the cards together and deal them out equally. Working in a clockwise direction, students take turns placing a card on the table. The card has to be frame one or the next frame in a line (frame two goes after frame one, frame three after frame two, etc.). If a student cannot place a card, he/she has to pass. The winner is the first player to get rid of all his/her cards.

Song worksheet

- Students listen to the song (Track 11) and complete the lyrics. They cut out the six pages and staple them together to make a book. They then cut along the dotted line. As students turn the pages, they will read mostly silly questions and some sensible ones.

Key: See Student's Book, page 39.

- **Optional follow-up activity:** Students work in groups. One student turns the pages of his/her book, without the others looking, and chooses a combination which he/she then reads aloud. The first student to turn their pages to that sentence takes the next turn.

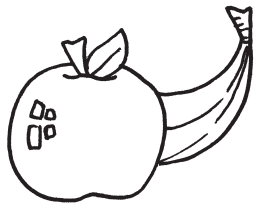

Topic worksheet

- Students make a mini book. First they fold along fold 1, then they cut along the dotted lines. Next they fold along fold 2 and the remaining two lines. When all the folds have been made, students open the sheet up and fold along fold 2 again. They join point a to point b, point c to point d and, finally, point e to point f. Once they have made the book, they decide on one item from each page and subtract from the initial sum the price of the item they have chosen so that by the end of the book, they have money left over from their shopping trip.
- **Optional follow-up activity:** Students take turns reading their shopping stories. How many of them have ended up with the same sum?
